

「油」你選擇

忙於使用防曬乳護膚時，你有考慮過海洋的感受嗎？現時不少防曬用品中含有多種降低珊瑚免疫力和分泌系統等化學物，繼而嚴重影響整個海洋生態。『「油」你選擇』致力希望提倡市民改變既有習慣，在選購防曬用品時轉用「珊瑚友善」的產品。本計劃會透過市場調查，了解市面上防曬用品中的成分是否對海洋生態有害。調查完成後將向大眾公佈有關結果，以作參考。另設攤位和網上問卷調查，從而了解不同年齡層對防曬用品的認知程度，向大眾宣傳有關「珊瑚友善」防曬用品的知識。

Have you ever thought of the usage of sunscreen can be a culprit of the damage of our marine ecosystem? Lot's of sunscreen contain ingredients which decrease corals' defenses against bleaching, damaging their DNA and hurting their development. Our project aims at advocating the public to put their awareness into action. By promoting the use of "coral safe" sunscreen, the impact on our ocean can be lessened. Through conducting market research, basic information about the ingredients sunblock brands in the market will be collected. Research is then carried out to see whether these ingredients are harmful to the marine ecosystem. The results of the market research will be published as reference for the general public. Moreover, educational booth and online surveys are carried out to comprehend the cognition towards sunscreen products among different age groups. Knowledge concerning the sunscreen products will also be imparted to the public.
