

## 海洋尋寶之旅

# Ocean Adventure: Future Storyteller

這個計劃目的是透過利用立體故事書與小孩子互動，讓他們認識人類活動如填海，日常棄置的垃圾如何影響到海洋生物如海龜，魚類。當小孩子代入故事主角時，便能啟發他們思考海洋環境污染問題與人類活動的關係，跟着主角一起探索現今備受破壞的海洋世界，從而去理解身為地球一部份有其責任保護海洋及在內的生物。

Humans have caused huge impacts on the ocean and numerous scientific studies have shown that human activities such as marine debris and land reclamation have been altering the marine habitats over the last few decades. It is important to educate the young generation to prevent further pollution and protect our ocean. The aim of this activity is to provide information and inculcate positive values to kindergarten students by storytelling. Throughout the activity, children are encouraged to express their own thoughts and feelings on ocean issues and threats. An interactive storytelling makes the children more interested in the story and eventually able to empathize with the marine lives as well as inspires them to take responsibilities on safeguarding the ocean.
