Q1. 有意見認為要解決現時既氣候變化及空氣污染問題，政府需要逐步改用可再生能源去取代煤、天然氣及石油等化石燃料來發電。你有幾同意或唔同意呢個意見？

It is proposed that in order to solve the current climate change/global warming and air pollution problems, the government should start to replace fossil fuels such as coal, natural gas and petroleum with renewable energy for electricity generation. How much do you agree or disagree with this view?

Q2 你有幾清楚兩間電力公司係減少排放溫室氣體方面既表現？

How familiar are you with the performance of reducing greenhouse gas emissions by the two power companies?
